

Mostafa Zamani - Web Developer

Hey there! I'm Mostafa, a web developer who turns code into captivating user experiences (with just a dash of magic). Whether it's crafting pixel-perfect designs or building seamless back-end solutions, I bring a passion for clean, responsive, and engaging websites. I'm here to tackle challenges, make the web a better place, and maybe even save a few projects from the dreaded "Page Not Found." Dive in to check out my work—let's build something awesome together!

"Catch the Bug" Mini-Game

- Idea: A game where users click on bugs (icons representing coding bugs) that appear randomly on the screen. Each click scores a point, and the game lasts for a limited time.
- Skills Showcased: DOM manipulation, timing functions, event listeners, and basic game mechanics.
- Added Cool Factor: Use clever bug icons (e.g., a broken code snippet), and make them move faster as the game progresses!
